Identifying Global Issues

Identifying Global Issues

- Step 1: Identify needs that you have been confronted with in your local community as well as in your abroad community.

- Step 2: Reflect on your personal passions.

- Step 3: Identify "knowledge gaps" in your local community.

Discussion: Global and Local Needs

What issues were you confronted with while you were abroad? What issues have you been confronted with locally?

Discussion: Personal Passions

Reflect on your personal passions. What issues motivate you to take action?

Discussion: Identify Knowledge Gaps

Think about your local community. Are there global issue knowledge gaps in your community?

What Issue will you Address?

As a team think about the discussions you just had. What issues seemed to resonate with the whole team? What issues need to be addressed in order to fill local knowledge gaps?
